

# Information Access Category 1: Information Retrieval

*HIV/AIDS* Community Information Outreach Program

U.S. National Library of Medicine

# Information Retrieval

- Implement access to state-of-the-art AIDS-related information tools via the Internet and/or mobile technologies
- Provide or improve access to NLM HIV/AIDS Information Resources, PrEP Navigator Resources, and other AIDS-related information resources by the organization for their clients and/or an intended audience they serve
- *This may require the purchase of hardware (computer equipment) or software for the purpose of accessing or sharing AIDS-related information*

# Information Retrieval: Project Examples

- Online living library database
- Information retrieval skills development training for health outreach workers and local community-based organizations
- Mobile-Internet-based HIV/AIDS Education: Linking the Public to Science

# Information Retrieval: Measures

- Awareness
  - Marketing / awareness of information
  - Community partnerships / community engagement
- Access
  - Retrieval skills
  - Access to computers, mobile, and Internet
  - Proof of access
    - Number of visits
    - Types of resources
